ACKNOWLEDGEMENT

The experience that we have gathered during the project has been unique and overwhelming. For this we pleased to express our deepest sense gratitude and regards to our respect project guide.

In spite of his busy schedule, his frequent valuable advice and master suggestions at every stage lead to a systematic approach in completing this project without which this project work could not take its shape.

We are very thankful to all, who have provided us with their, guidance and encouragement.

Lastly, with all my heart, I express my deep gratitude to our parents.

Introduction

Online Book Store software projects that acts as a central database containing various books in stock along with their title, author and cost. This project is a website that acts as a central book store. This web project is developed using asp.net as the front-end and sql as a back-end. The sql database stores various book related details. A user visiting the website can see a wide range of books arranged in respective categories. The user may select desired book and view its price. The user may even search for specific books on the website. Once the user selects a book, he then has to fill in a form and the book is booked for the user.

Project Goal

We the students of BCA 6th semester of **Cyber Research & Training Institute** have created a project using PHP & MYSQL. In our project we have done **Online Book Store**. Our goal for this project was to create a website where customer can search for books and then add them to the cart to order later. Admin can add or delete books and view customer, order and shipping details. Customers can also contact the customer service team on the website.

Software Requirements

For doing our project in PHP/My SQL the software we required is:-

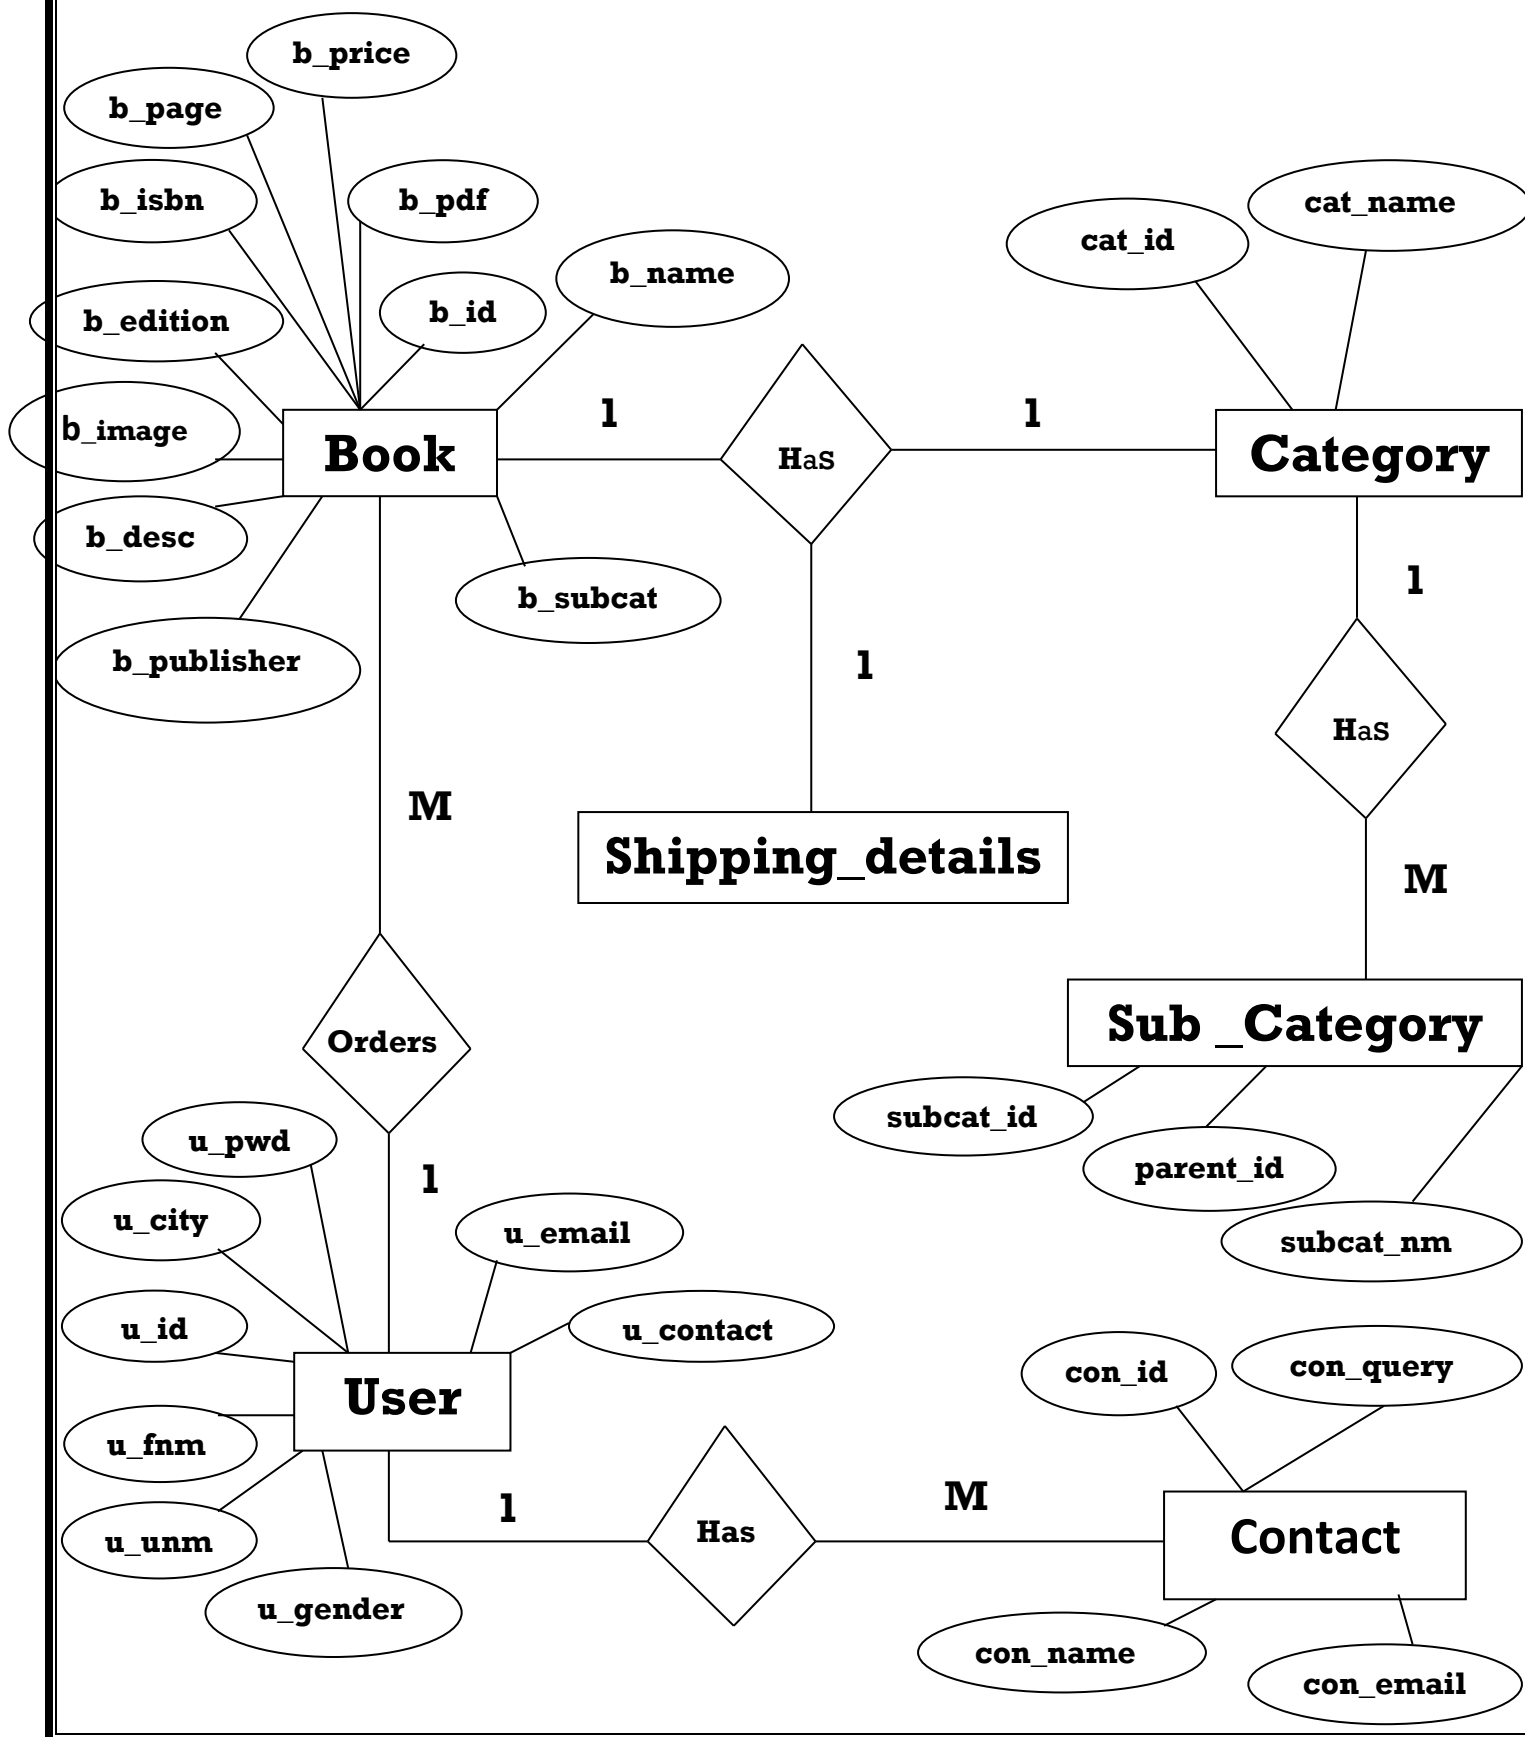

- XAMPP Server
- PHP Version 8.0.13
- Apache Version 2.4
- MySQL Version 5
- VS Code
- MS Word

Hardware Requirements

For completion of our project we need the following hardware.

1. Processor - Intel i3 or i5
2. Hard Disk - 1 TB or 512 GB
3. Memory - 4 or 8GB RAM
4. OS - Windows 8 or 10

FUTURE SCOPE

Here we can maintain the records of Books and Stock. Also, it can be seen that nowadays the players are versatile, i.e. so there is a scope for introducing a method to maintain the Online Book Store. Enhancements can be done to maintain all the Books, Stock, Customers, Orders, and Payments.

We have left all the options open so that if there is any other future requirement in the system by the user for the enhancement of the system then it is possible to implement them. Some of the future enhancements that we felt to implement in the future I the integration of the payment gateway, login through OPT etc. In the last, we would like to thank all the persons involved in the development of the system directly or indirectly. We hope that the project will serve the purpose for which it is developed thereby underlining the success of the process.

CONCLUSION

We thus here represent our project with our entire effort. We hope that the system we are depicting will be highly benefited by this venture. Hope you all will consider our tiring effort very gladly. We hereby also place a request that in case of any flaw in our work, please forgive us. We welcome any criticism that may help us and would gladly appreciate any words encouragement which would push us to work even harder in future. Thanking you all in anticipation. Hope you all will favor our work and enlighten us in our future works.

We conclude by asking you all to lend us some big wishes.

BIBLIOGRAPHY

To make this project we have taken help from the following books –

1. MySQL Crash Course by Ben Forta
2. PHP: A BEGINNER'S GUIDE by Vikram Vaswani

We have also taken help from the following internet resources –

1. <https://www.w3schools.com/>
2. <https://www.simplilearn.com/tutorials/php-tutorial>
3. <https://www.udemy.com/course/html5-fundamentals-for-beginners>
4. HTML5 crash course for beginners - <https://youtu.be/UB1O30fR-EE>
5. CSS crash course for beginners - <https://youtu.be/yfoY53QXEnI>
6. JavaScript basics for beginners -> <https://youtu.be/vEROU2XtPR8>
7. SQL Tutorial - Full Database Course for Beginners – <https://youtu.be/HXV3zeQKqGY>
8. Database overview -> <https://youtu.be/wR0jg0eQsZA>
9. ER Diagram Part1 -> <https://youtu.be/QpdhBUYk7Kk>
10. ER Diagram Part2 -> <https://youtu.be/-CuY5ADwn24>
